To meet the requirements of HAVA, Mississippi successfully implemented a Statewide Elections Management System (SEMS) and 77 counties are acquiring a uniform touchscreen voting system to replace non-HAVA compliant systems. This transition necessitated meetings across the state with election officials, special interest groups, the disabled community and general public.

Explanations:

Equipment. A PowerPoint Projector and Laptop are used in presentations to educate elected officials and the general public about HAVA requirements, the need for new voting systems, how to demonstrate and use the new voting systems. This equipment was instrumental in that successful effort.

Commodities, Contractual Services, and Travel. In order to comply with the HAVA requirements of education, training, and improving voting systems the Mississippi Secretary of State's office conducted numerous presentations across the state with election officials, special interest groups, the disabled community and general public in 2005. This necessitated direct use of HAVA funds for printing briefing materials, supplies, working luncheons, and meeting expenses. This educational outreach effort is crucial to the successful implementation of HAVA.
